

WARNING

Following any accident you may be contacted out of the blue by a “cold caller” or “claims harvester”. This person will have purchased your private details illegally, and will try and convince you to make a personal injury claim using a law firm recommended by them. It is important that you be aware that no reputable or ethical law firm would ever be a party to such an arrangement, as it is both illegal, a scam, and designed to rip you off.

So, if you ever do receive a cold call we suggest you tell them nothing and just hang up, BUT in any event:

Never give out any personal information to anyone you don't know on the telephone or by email

Never discuss your accident or your injuries with anyone you don't know on the telephone or by email

Add yourself to the Do Not Call Register as a precaution www.donotcall.gov.au

Never call unknown numbers back or respond to strange voicemails

Ignore all unsolicited emails or text messages
